NOTE: Sign up here if you would like to		you will be able to									
NOTE: Sign up here if you would like to give a talk or a poster at the Berkeley BAPGXIII Conference on 02/13/16		you will be able to follow us on twitter at #bapgxiii									
BAPGXIII Conterence on 02/13/16		woapgxiii									
Sign up for a talk or poster											
15 minute contributed talks (+5 min for questions)	Affiliation	Lab	Title	Tweetable (#bapgxiii)							
			The fitness cost of every mutation in the HIV								
Pleuni Pennings	SFSU	Pennings	genome	@pleunipennings							
Kristin Lee	UC Davis (graduate student)	Coop	Distinguishing modes of convergent adaptation in genomic data	yes							
		Whiteman	Pool-GWAS and the genetic basis of a key innovation in insects								
Noan Wniteman	UC Berkeley	vvnneman	Malaria parasites drive adaptation in host	yes @flyminer							
	Stanford	Petrov	genomes	yes							
Fernando Racimo	UC Berkeley	Nielsen	Archaic adaptive introgression in humans	yes @ferracimo							
Jinliang Yang	UC Davis	Ross-Ibarra	Incorporation of evolutionary constraint improves genomic prediction of hybrid phenotypes	yes @JinliangYang							
			Estimating the age of a clonal lineage of the Irish								
Mike Martin	UC Berkeley	Slatkin	potato famine pathogen Gener are Born Modular. Selective Filtering of	yes @MuseumEvoGen							
Lee Altenberg	Konrad Lorenz Institute, Austria		Genes are Born Modular: Selective Filtering of Pleiotropy in De Novo Genes	yes							
Diana Fusco	UC Berkeley	Hallatschek	Spatial growth promotes the emergence of mutational jackpot events in microbial populations								
Diana Pusco	ос вежееу	rialiaiscrick	Genomic evidence of ecological speciation driven								
Yoosook Lee	UC Davis	Vector Genetics	Genomic evidence of ecological speciation driven by immune genes among African malaria vectors species								
COSOOK LEE	UU Java	Vaccion Genetics	apricad								
POSTERS											
Kirsten Verster	UC Berkeley (graduate student)	Whiteman	The evolution of parasitoid resistance in insects through behavioral change								
			Coalescent models toward precise detection of								
Aaron Stern	UC Berkeley	Nielsen (rotation)	selective sweeps								
			Comorbid Analysis of Genes Associated with Autism Spectrum Disorders Reveals Differential								
Maude David	Stanford University	Wall lab	Evolutionary Constraints.								
Maude David	Stanford University	Wall lab	Impact of the gut microbiota on the autism phenotype								
Alison Feder and Pleuni Pennings	Stanford / SFSU	Petrov / Pennings	Better drugs lead to harder sweeps in HIV								
Christopher Hann-Soden	UC Berkeley	Taylor Lab	An evolutionary ratchet in haploid selfing populations								
			Evidence of multiple introductions of Ustilago maydis to the Old World								
	UC Berkeley										
Marie Donnelly Youki Yamasaki, Allison Chang, Catelyn	UC Berkeley	Taylor Lab	TBA Improved tools for genomic DNA library								
Nieman, Yoosook Lee	UC Davis		construction of small insects								
			Holobiome evolution: A computational model of microbiome assembly dynamics and community-								
			level evolutionary change								
Oren Kolodny	Stanford	Marc Feldman lab	level evolutionary change								
		Marc Feldman lab	level evolutionary change								
Nathan Schaefer	UC Santa Cruz	Marc Feldman lab Green/Shapiro	level evolutionary change								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz	Marc Feldman lab Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants								
Nathan Schaefer Sam Vohr	UC Santa Cruz UC Santa Cruz	Marc Feldman lab Green/Shapiro Green/Shapiro	level evolutionary change Investigating the genetics of speciation by inferring the ancestry of regions of hybrid bear genomes Anomalous distribution of low-frequency variants
